The seekers then try to restore the pile of stones while staying safe from the opposing team's (the hitters') throws. The hitters' objective is to hit the seekers with the ball before they can reconstruct the stone pile. If the ball touches a seeker, that seeker is out and the team which the seeker came from continues, without the seeker. A seeker can always safeguard themselves by touching an opposite team member before the ball hits the seeker.

The game takes place on a hard table divided by a net. Except for the initial serve, the rules are generally as follows: players must allow a ball played toward them to bounce once on their side of the table and must return it so that it bounces on the opposite side at least once. A point is scored when a player fails to return the ball within the rules. Play is fast and demands quick reactions.
